DIGITAL ASSETS TRADING

Automated Trading
of Digital Assets

MARK DAMBACHER, CEO
INCORE BANK:

'We notice that digital assets are being addressed by a growing number of banks. But technical and operational challenges are a deterrent. This is where InCore Bank comes in with its offer. The customers use the existing set-up without any integration effort and immediately start trading and custody, which runs through InCore Bank.'

COMPLETELY AUTOMATIC CONNECTION

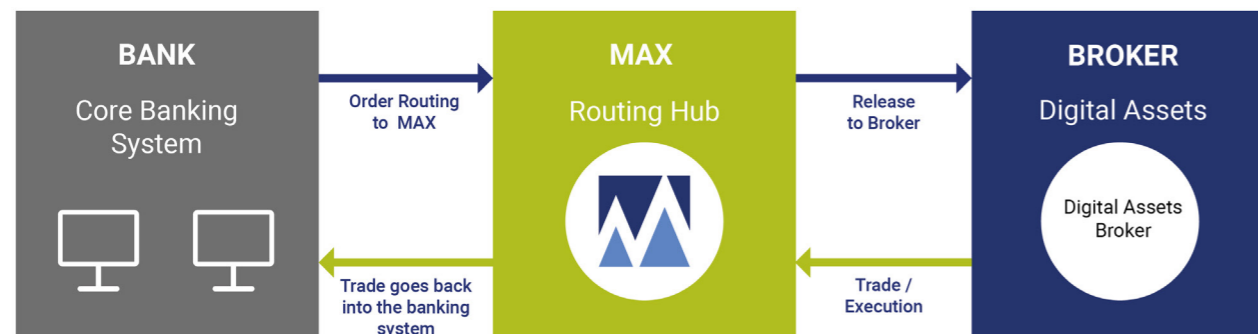

In cooperation with InCore Bank AG and Sygnum Bank AG, MACD offers trading in cryptocurrencies and a variety of other digital assets.

The joint solution enables all MACD customers to trade and hold assets automatically via existing interfaces to their core banking systems.

Orders are routed via Straight Through Processing (STP) technology from the core banking system to InCore Bank or Sygnum Bank via the MAX Routing Hub or can be entered directly into the MAX Order Management System. Execution and confirmation is fully automated back to the core banking system.

THE ADVANTAGES:

- ✓ Connection to existing infrastructure
- ✓ Reduction of the workload due to a high degree of automation
- ✓ No need to implement an additional system
- ✓ Secure custody through integration into the InCore Bank or Sygnum Bank infrastructure
- ✓ Savings in additional operating and maintenance costs

MACD BROKER PROGRAMM

incore

Our Digital Assets Broker InCore Bank participates in the MACD Broker Program.

This offers you as a customer advantages: The broker takes over a not insignificant part of the annual fees, which means lower costs for you. Smaller changes on the part of the broker are implemented by MACD without cost consequences (e.g. algo parameters, FIX tag changes).

MAX SERVICES
